

Special Issue on Pediatric Cancer and Blood Disorders

Call for Papers

Pediatric Cancer and Blood Disorders is a branch of medical science that focuses on the diagnosis, treatment, and management of cancer and blood disorders in children. Researchers study the causes, effects, and potential cures for various types of cancer and blood disorders that affect pediatric patients. The goal of this field is to improve survival rates, enhance quality of life, and develop innovative therapies tailored specifically for children facing these serious health challenges.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Pediatric Cancer and Blood Disorders**. Potential topics include, but are not limited to:

- Pediatric oncology
- Hematology
- Pediatric hemato-oncology
- Pediatric neuro-oncology
- Pediatric leukemia
- Pediatric lymphoma
- Pediatric sarcomas
- Pediatric brain tumors
- Stem cell and bone marrow transplants
- Pediatric palliative care
- Pediatric cancer genetics
- Pediatric cancer survivorship
- Pediatric thrombosis and hemostasis
- Pediatric sickle cell disease
- Pediatric bleeding disorders

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Pediatric Cancer and Blood Disorders**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 31st, 2024
Publication Date	July 2024
