TABLE OF CONTENTS
Volume 2, Number 2, June 2013

Healing of chronic diabetic foot ulcers with a skin substitute: Patient selection is the key to success
H. Alzahrani, H. Ammar, A. Alzahrani, H. Shoaib .................................................................15

Clinical translation of neuro-regenerative medicine in India: A study on barriers and enabling strategies
M. J. Messih, C. Emerson, H. Thorsteinsdóttir, M. G. Fehlings, A. S. Daar ...........................................20

A paradigm for a skin graft substitute
D. E. Solomon ........................................................................................................................................28

Therapeutic effects of human umbilical cord-derived mesenchymal stem cells against acute tubular necrosis quantified through measures of iNOS, BMP-7 and Bcl-2
F. Li, F. Xiong, Y. Zhang, Y. Y. Li, H. M. Zhao, S. C. Cho, T. E. Ichim, X. F Yang, X. Hu .................................31

Intravenous administration of adipose-derived stromal cells does not ameliorate bleomycin-induced lung injury in rats
M. Uji, A. Nakada, T. Nakamura ..................................................................................................................39

Open Journal of Regenerative Medicine (OJRM) is an international peer-reviewed, open access journal publishing in English original research studies, reviews and case reports in all aspects of Regenerative Medicine. Symposia or workshop papers may be published as supplements.

Editor-in-Chief
Prof. Peter K. Law
Huazhong University of Science and Technology, China

Subject Coverage

The submitted manuscript should not have been previously published in any form and must not be currently under consideration for publication elsewhere.

- Biodegradation nanomaterials
- Bioreactors and engineering of tissues
- Bone engineering
- Cardiovascular implants
- Cell therapies for muscle regeneration
- Cell-biomaterial interaction in tissue repair
- Cellular therapies within reach
- Embryonic stem cell promises and limitations
- Engineering of ligaments and tendons
- Heart muscle engineering and other organ systems
- Hollow organ engineering
- Improving vascularity in engineered constructs
- Innervations in engineered organs
- Medical device and artificial organ development
- Microenvironments and regeneration
- Nanotechnology and regenerative medicine
- Naturally derived biomaterials
- Neural tissue engineering
- Organ replacement within reach
- Peripheral nerves
- Stem cell pluripotency and emerging technologies
- Supporting liver and kidney function
- Synthetic biomaterial development
- Therapies using engineered tissues
- Tissue engineering and artificial organ development

We are also interested in: 1) Short reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book reviews—Comments and critiques.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
