

Special Issue on Physical Therapy and Rehabilitation

Call for Papers

Physical therapy and rehabilitation is a healthcare profession that aims to enhance and restore the physical abilities and mobility of individuals who have been affected by injury, illness, or disability. This branch of healthcare focuses on using a combination of manual therapy, exercise, and other techniques to promote healing, pain relief, and functional improvement. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Physical Therapy and Rehabilitation.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Physical Therapy and Rehabilitation**. Potential topics include, but are not limited to:

- Acupuncture
- Balance disorders
- Cardiopulmonary rehabilitation
- Cerebral palsy
- Cryotherapy
- Developmental delays
- Electroacupuncture
- Electrophysiology
- Gait disorders
- Geriatric physical therapy
- Heart surgery
- Manual therapy
- Massage therapy
- Musculoskeletal disorders
- Neurological physical therapy
- Pediatric physical therapy
- Physical therapy
- Pulmonary rehabilitation
- Spinal cord injury
- Sports injuries
- Telehealth
- Therapeutic exercises
- Traumatic brain injury

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - *Physical Therapy and Rehabilitation***” should be selected during your submission.

Special Issue Timetable:
