

Special Issue on Prostate Diseases and Treatment

Call for Papers

Prostatitis refers to a prostate disease caused by a variety of complex reasons, with urethral irritation and chronic pelvic pain as the main clinical manifestations. Prostatitis is a common disease in urology. Although the incidence of prostatitis is very high, its etiology is still not very clear, especially non-bacterial prostatitis. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Prostate Diseases and Treatment**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Prostate Diseases and Treatment**. Potential topics include, but are not limited to:

- Prostatitis
- Prostate cancer and biopsy
- Benign prostatic hyperplasia (BPH)
- Symptoms of prostatic inflammation
- Diagnosis & treatment
- Chronic bacterial prostatitis
- Chronic prostatitis/chronic pelvic pain syndrome
- Asymptomatic inflammatory prostatitis
- Prostate surgery and recovery
- Sexual dysfunction

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Prostate Diseases and Treatment**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	March 7th, 2021
Publication Date	May 2021
