

## Special Issue on Prostate Diseases and Treatments

### Call for Papers

The prostate is a gland in the male reproductive system that produces fluids that feed and protect sperm cells. Prostate diseases and their treatments are a significant aspect of men's health. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Prostate Diseases and Treatments.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Prostate Diseases and Treatments**. Potential topics include, but are not limited to:

- Benign prostatic hyperplasia
- Brachytherapy
- Chemotherapy for prostate cancer
- External beam radiation therapy
- Hormone therapy side effects
- Immunotherapy for prostate cancer
- Laparoscopic prostate surgery
- Metastatic prostate cancer
- Prostate artery embolization
- Prostate cancer and biopsy
- Prostate health supplements
- Prostate surgery and recovery
- Prostatectomy
- Prostate-specific membrane antigen PET scan
- Prostatitis
- Proton therapy
- Radical retropubic prostatectomy
- Robotic-assisted prostate surgery
- Sexual dysfunction
- Watchful waiting

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Prostate Diseases and Treatments**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	July 18th, 2024
Publication Date	September 2024
