

Special Issue on Laser Technology and Application

Call for Papers

The light beam produced by most lasers is pencil-sized, and maintains its size and direction over very large distances; this sharply focused beam of coherent light is suitable for a wide variety of applications. Lasers have been used in industry for cutting and boring metals and other materials as well as welding and soldering, and for inspecting optical equipment. In medicine, they have been used in surgical operations.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **laser technology and application**. In this special issue, potential topics include, but are not limited to:

- Information technology
- Telecommunications
- Medicine
- Measurement and analysis
- Manufacturing
- Military
- Industrial and commercial

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Laser Technology and Application**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	February 25th, 2016
Publication Date	April 2016

Guest Editor:

Prof. Bouzid Menaa, Fluorotronics Inc., USA
