Special Issue on Psychology of Sport and Exercise

Call for Papers

Psychology of sport and exercise involves the study of how psychological factors affect performance and how participation in sport and exercise affect psychological and physical factors. In addition to instruction and training of psychological skills for performance improvement, applied sport psychology may include work with athletes, coaches, and parents regarding injury, rehabilitation, communication, team building, and career transitions.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on Psychology of Sport and Exercise. Potential topics include, but are not limited to:

- Cognition, emotion and action in Sport
- Mental skills and performance improvement
- Sport, exercise, and performance psychology
- Motivation and competition
- Social cognitive theory and physical activity
- Personality and behavior in sport
- Sport psychology intervention
- Clinical sport & exercise psychology
- Injury and psychological rehabilitation
- Sports neuropsychology
- Social psychology in sport and exercise
- Physical exercise for treatment of mood disorders
- Anxiety and stress management in sports
- Team psychology in sports
- Communication skills in sports
- Psychological benefits of exercise for children

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Psychology of Sport and Exercise” should be chosen during your submission.
