Special Issue on Cognitive Psychology

Call for Papers

Cognitive Psychology is an academic discipline that focuses on studying mental processes involved in acquiring, processing, storing, and using information. It examines how individuals perceive, think, remember, problem-solve, and make decisions. Cognitive psychologists investigate various aspects of cognition, including attention, perception, memory, language, learning, and problem-solving. They explore how people perceive and interpret sensory information, how memory works and affects our understanding of the world, how language is processed and understood, and how individuals acquire new knowledge and skills. Cognitive psychology provides valuable insights into human cognition and helps us understand the complex workings of the human mind. It contributes to our knowledge of how individuals perceive, think, and process information, ultimately leading to a better understanding of human behavior and the development of interventions to enhance cognitive functioning and well-being.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on Cognitive Psychology. Potential topics include, but are not limited to:

- Behavioral and computational approaches
- Experimental methods and techniques
- Memory and imagination
- Attention
- Perception and behavior
- Learning and skill acquisition
- Intelligence and working memory
- Language and cognition
- Cognitive psychology of emotion
- Cognitive control
- Cognitive development
- Aging and cognition
- Mental models in cognitive change
- Decision-making
- Reasoning and problem solving
- Cognition and personality
- Social cognition
- Cognitive disorders
- Cognitive behavioral therapy
- Cognitive psychology in education
Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Cognitive Psychology” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>December 28th, 2023</th>
</tr>
