TABLE OF CONTENTS

Volume 3, Number 2, April 2013

Establishment and molecular characterization of human dermal mesenchymal-like stem cells derived from human scalp biopsy of androgenetic alopecia patient	
P. Potdar, K. S. Kumar.....	77
Mechanistic study of angiogenesis induced by <i>shh</i>-transfected BMMSC transplantation after myocardial infarction	
F. L. Song, M. Wu, T. Tang, X. M. Wu, W. W. Zhou, J. Shi, W. Zhang, Z. P. Tan, J. F. Yang.....	83
Influence on proliferation and inducing capacity of bone mesenchymal stem cells during myocardial differentiation and construction of engineered myocardium-like tissue <i>in vitro</i>	
W. H. Xing, L. P. Tian, J. H. Zhang, N. Wang, P. Chen, J. Ma.....	90
Long-term phenotypic characterization of human bone marrow and adipose tissue derived mesenchymal stromal cells	
D. L. Glettig, D. L. Kaplan.....	99
Hematopoietic stem cells are a critical sub-population of whole bone marrow in the treatment of myocardial infarction	
P. Davy, B. Walker, L. Wong, R. Allsopp.....	117
Distinct functions of Dnmt3a and Dnmt3b de novo DNA methyltransferases in ES cell proliferation and differentiation	
Y. Umehara, K. Hanaoka, D. Watanabe.....	127
Direct pre-differentiation of rat mesenchymal stem cells into dopaminergic cells	
J. Zavala-Arcos, M. T. Gonzalez-Garza, J. Gutierrez-Alcala, H. R. Martinez, J. E. Moreno-Cuevas.....	133
Cell based therapy aides in infection and inflammation resolution in the murine model of cystic fibrosis lung disease	
T. L. Bonfield, D. Lennon, S. K. Ghosh, A. M. DiMarino, A. Weinberg, A. I. Caplan.....	139

The figure on the front cover is from the article published in Stem Cell Discovery, 2013, Vol. 3, No. 2, pp. 133-138 by Judith Zavala-Arcos, *et al.*

Stem Cell Discovery

ISSN 2161-6760 (Print) ISSN 2161-6787 (Online)
<http://www.scirp.org/journal/scd>

Stem Cell Discovery (SCD) is an international journal dedicated to the latest advancement of stem cell discovery. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of stem cell discovery. All manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by printed hard copy.

Stem Cell Discovery, a peer reviewed journal, provides a forum for prompt publication of original investigative papers and concise reviews. It will include all the primary discoveries from stem cell basic and translational research, specifically including the fields but not limited as the follows:

a) Fields:

- Stem Cell and Diseases
- Stem Cell Development and Differentiation
- Stem Cell Therapy
- Tissue Regeneration

b) All types of stem cells: Adult Tissue Stem Cells (ATSC); Embryonic Stem Cells (ESC); Germline Stem Cells (GSC); Inducible Stem Cells (ISC).

c) Various organisms: from insects to mammalian

We are also interested in: 1) Short reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book reviews—Comments and critiques.

Notes for Intending Authors

Submitted papers should not be previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. For more details, please access the website.

What is SCIRP?

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

What is Open Access?

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
