

Special Issue on
Renewable Energy Techniques and Applications

Call for Papers

Energy is a main impetus of economy development and the physical foundation of modern civilization. **Renewable energy** is derived from natural processes that are replenished constantly. Fast development of renewable energy and energy efficiency, and technological diversification of new energy sources, would bring remarkable energy security and economic benefit.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **renewable energy techniques and applications**. Potential topics include, but are not limited to:

- Techniques of renewable energy
- Biomass conversion
- Photovoltaic techniques
- Solar energy technology
- Geothermal technology
- Wave, tide and ocean energy
- Hydrogen production
- Applications

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Renewable Energy Techniques and Applications**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	February 25th, 2016
Publication Date	April 2016

Guest Editor:

Prof. Victor Sreeram
University of Western Australia, Australia
