

Special Issue on Electric Power Systems

Call for Papers

Nowadays electric power industry is undergoing radical transformations. People request utilities to deliver electric power in a stable, reliable, secure and sustainable manner. Consequently, it is necessary to improve the efficiency of electric power system operation and emergency control. The goal of this Special Issue is to provide a platform for scientists worldwide to promote, share, and discuss various new issues and developments in the area of **electric power systems**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **electric power systems**. Potential topics include, but are not limited to:

- Power quality
- Power system stability
- Power system reliability
- Power market
- Smart grid
- Distributed generation resources

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Electric Power Systems**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	December 27th, 2016
Publication Date	February 2017

Guest Editor:

Prof. **Yuanzhang Sun**
Wuhan University, China
