

Advances Research in Shoulder and Elbow Surgery

Call for Papers

As the shoulder and elbow are the complex and unstable joint in the body, it can get injured easily. Many surgeries have been developed to repair the muscles, connective tissue or damaged joints that can arise from traumatic or overuse injuries to the shoulder and elbow. Topics on fractures, dislocations, diseases and injuries of the rotator cuff, imaging techniques, arthritis, arthroscopy, arthroplasty, and rehabilitation are discussed in this field.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Shoulder and Elbow Surgery**.

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission, Prospective authors should submit an electronic copy of their complete manuscript through the journal [Paper Submission System](#).

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue- *Shoulder and Elbow Surgery***" should be chosen during your submission.

According to the following timetable:

Manuscript Due	July 11th, 2013
Publication Date	September 2013
