

## Special Issue on Advances in Public Economics

### Call for Papers

Public economics, also called economics of the public sector, is a branch of the field of economics focused on studying the public sector and examining the ways it interacts with the private sector. At its most basic level, public economics provides a framework for thinking about whether or not the government should participate in economics markets and to what extent its role should be. A variety of topics are covered, including taxation, welfare, and the impact of social policy on economic health.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Advances in Public Economics**. Potential topics include, but are not limited to:

- Governmental interference
- Government policy
- Distributional effects of taxation
- Theory and application of public finance
- Analysis and design of public policy
- Analysis of market failure and government failure
- Theory of public goods

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Advances in Public Economics**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	December 10th, 2015
Publication Date	February 2016
