

Special Issue on Economics and Financial Engineering

Call for Papers

Financial engineering is a multidisciplinary field involving financial theory, methods of engineering, tools of mathematics and the practice of programming. It has also been defined as the application of technical methods, especially from mathematical finance and computational finance, in the practice of finance. Financial engineering draws on tools from applied mathematics, computer science, statistics and economic theory.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Economics and Financial Engineering**. Potential topics include, but are not limited to:

- Business statistics/econometrics
- Quantitative methods
- Behavioral economics and finance
- Mathematical finance
- Economics for financial markets
- Economics of money and banking
- Corporate finance and strategic planning
- Economic growth and development
- Finance and labor markets
- Small business management
- Entrepreneurship
- International economics and finance
- Government finance and regulation
- Financial information management
- Risk management
- Economics of innovation
- Modern portfolio theory

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Economics and Financial Engineering**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 24th, 2022
Publication Date	July 2022
