

Special Issue on
Microeconomic Theory and Applications
Call for Papers

Microeconomics is a branch of economics that studies the behavior of individuals and firms in making decisions regarding the allocation of scarce resources and the interactions among these individuals and firms. One goal of microeconomics is to analyze the market mechanisms that establish relative prices among goods and services and allocate limited resources among alternative uses. Microeconomics shows conditions under which free markets lead to desirable allocations. It also analyzes market failure, where markets fail to produce efficient results.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Microeconomic Theory and Applications**. Potential topics include, but are not limited to

- Models in microeconomic theory
- Resource allocation and economic systems
- Market structures and firm performance
- Competitive model
- Supply, demand, and market equilibrium
- Microeconomics and behavior
- Experimental economics
- Consumer demand theory
- Microeconomic decision-making
- Theory of consumer choice
- Game theory
- Price theory
- Mergers & acquisitions
- Monopoly
- Real estate economics
- Labor markets
- Industrial organization
- Cost of production
- Profit maximization

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Microeconomic Theory and Applications**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	August 30th, 2022
Publication Date	October 2022
