

Special Issue on
Microeconomic Theory and Applications
Call for Papers

Microeconomics is a branch of economics that studies the behavior of individuals and firms in making decisions regarding the allocation of scarce resources and the interactions among these individuals and firms. One goal of microeconomics is to analyze the market mechanisms that establish relative prices among goods and services and allocate limited resources among alternative uses. Microeconomics shows conditions under which free markets lead to desirable allocations. It also analyzes market failure, where markets fail to produce efficient results.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Microeconomic Theory and Applications**. Potential topics include, but are not limited to

- Models in microeconomic theory
- Resource allocation
- Market structures and performance
- Market regulation and design
- Demand and supply
- Competitive model
- General equilibrium analysis
- Microeconomics and behavior
- Consumer demand theory
- Decision-making
- Consumer choice theory
- Price theory
- Exchange, efficiency, and prices
- Mergers & acquisitions
- Monopolistic competition and oligopoly
- Managerial theories of firm
- Microeconomics of housing
- Labor markets
- Industrial organization
