

Special Issue on Economic Modelling

Call for Papers

In economics, a model is a theoretical construct representing economic processes by a set of variables and a set of logical and/or quantitative relationships between them. The economic model is a simplified, often mathematical, framework designed to illustrate complex processes.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Economic Modelling**. Potential topics include, but are not limited to

- Theory, methods and applications
- Mathematical and economic modelling
- Applied international economics
- Economic integration models
- Stochastic models
- Qualitative models
- Economic growth model
- Economic models for policy making
- Models of financial markets
- Business process modeling
- Decision-making models
- Macroeconomic model
- Economic prediction
- Econometric modelling
- Optimization model
- Crises and uncertainty in the economy
- Pricing strategies & models

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – *Economic Modelling***” should be chosen during your submission.

According to the following timetable:

Scientific Research
Open Access

Theoretical Economics Letters

ISSN Online: 2162-2086

Submission Deadline	April 25th, 2023
Publication Date	June 2023
