Special Issue on Economic Growth

Call for Papers

Economic growth is the increase in the overall output of an economy over time, usually measured by the level of Gross Domestic Product (GDP) or other similar indicators. It is a key goal of many countries and regions, as it typically leads to improvements in living standards, increased employment opportunities, and better access to goods and services. Economic growth can be achieved through various means, including increased capital investment, technological innovation, and changes in government policies.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Economic Growth.** Potential topics include, but are not limited to:

- Theories and models of economic growth
- Macroeconomic analysis
- Microeconomics of economic growth
- International economics of economic growth
- Political economy of economic growth
- Environmental economics of economic growth
- Development economics of economic growth
- Experimental and behavioral economics of economic growth
- Human capital and economic growth
- Innovation and economic growth
- Trade, investment and economic growth
- Entrepreneurship and economic growth
- Productivity and growth

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue – *Economic Growth***" should be chosen during your submission.

According to the following timetable:

Submission Deadline	January 8th, 2024

Publication Date	March 2024
