## Special Issue on Acquired Immunodeficiency Syndrome

### Call for Papers

Acquired Immunodeficiency Syndrome (AIDS) is a complex and potentially fatal condition caused by the human immunodeficiency virus (HIV). AIDS is characterized by a severely compromised immune system, making individuals more susceptible to various infections and cancers. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Acquired Immunodeficiency Syndrome.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Acquired Immunodeficiency Syndrome**. Potential topics include, but are not limited to:

- HIV (Human Immunodeficiency Virus)
- Immune system
- Opportunistic infections
- HIV transmission
- Sexual intercourse
- Unprotected sex
- Contaminated needles/syringes
- Mother-to-child transmission
- Blood transfusions
- Antiretroviral therapy (ART)
- Viral replication
- Prognosis
- Quality of life
- Early diagnosis
- HIV testing
- Vaccines
- Global health

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Acquired Immunodeficiency Syndrome**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	September 5th, 2024
Publication Date	November 2024

**Guest Editor:**
