## Special Issue on Machine Tool and Manufacturing

### Call for Papers

A **machine tool** is a machine for shaping or machining metal or other rigid materials, usually by cutting, boring, grinding, shearing, or other forms of deformation. It's widely used in the manufacture of engineering components.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **machine tool and manufacturing**. Potential topics include, but are not limited to:

- Functions and performance characteristics
- Tool design
- Tool and automatic control
- Cutting and welding
- Milling process
- CNC machining
- Precision manufacturing
- Processing of machine components
- Machine tools and industrial engineering

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Machine Tool and Manufacturing**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	June 27th, 2018
Publication Date	August 2018

#### Guest Editor:

**Scientific Research**  
*Open Access*

## **World Journal of Engineering and Technology**

**ISSN Online: 2331-4249**
