Special Issue on Vehicle Engineering

Call for Papers

Automotive engineering is a combination of mechanical, electrical and materials science. Engineers in this field can design new vehicles or look for ways to improve existing automotive engineering technology. The goal of this special issue is to provide a platform for scientists and academics all over the world to promote, share and discuss various new issues and developments in Vehicle Engineering.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore Vehicle Engineering. In this special issue, potential topics include, but are not limited to:

- Vehicle aerodynamics
- Vehicle electronics
- Electric and hybrid vehicles
- Intelligent transportation and vehicle control
- Advanced vehicle propulsion systems
- Design and integration of complex systems
- Connected and automated vehicles
- Structural strength of vehicle
- Overall vehicle design

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - Vehicle Engineering” should be selected during your submission.
