

Special Issue on Control Engineering

Call for Papers

Control engineering (or control system engineering) is the process of designing, analyzing, and optimizing a control system. A control system is a set of devices that regulates the behavior of other devices or systems. The goal of this special issue is to provide a platform for scientists and academics all over the world to promote, share and discuss various new issues and developments in **Control Engineering**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Control Engineering**. In this special issue, potential topics include, but are not limited to:

- Control theory
- Control systems
- Algorithm design and programming logic
- Applications of control engineering in automotive systems
- Applications of control engineering in intelligent transportation systems and traffic control
- Applications of control engineering in human machine systems
- Applications of control engineering in mechatronic systems

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Control Engineering**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	May 10th, 2023
Publication Date	July 2023
