

Special Issue on Modern Manufacturing Technology

Call for Papers

Modern manufacturing is at the core of industrial production from base materials to semi-finished goods and final products. Over the last decade, a variety of innovative methods have been developed that allow for manufacturing processes that are more versatile, less energy-consuming, and more environmentally friendly. The goal of this special issue is to provide a platform for scientists and academics all over the world to promote, share and discuss various new issues and developments in **Modern Manufacturing Technology**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Measurement and Control Technology and Instrument**. In this special issue, potential topics include, but are not limited to:

- Modern methods of machining
- Metal-forming technologies
- Joining technologies
- Additive manufacturing technology
- Industrial assembly technologies
- Manufacturing engineering of composite materials
- Manufacturing systems design for industrial applications
- Paradigms of modern manufacturing system designs

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Modern Manufacturing Technology**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	September 27th, 2023
Publication Date	November 2023
