TABLE OF CONTENTS

Volume 3 Number 1 March 2013

C@Ag/TiO_2: A Highly Efficient and Stable Photocatalyst Active under Visible Light
B. Jin, X. S. Zhou, X. Y. Xu, L. Ma, Z. J. Wu, Y. S. Huang……1

Simulation of Structural Characteristics and Depth Filtration Elements in Interconnected Nanofibrous Membrane Based on Adaptive Image Analysis
M. K. Pilehrood, P. Heikkilä, A. Harlin……6

Threshold Voltage Sensitivity to Metal Gate Work-Function Based Performance Evaluation of Double-Gate n-FinFET Structures for LSTP Technology
M. Mustafa, T. A. Bhat, M. R. Beigh……17

The figure on the front cover is from the article published in World Journal of Nano Science and Engineering, 2013, Vol. 3, No. 1, pp. 6-16 by Mohammad Kazemi Pilehrood, Pirjo Heikkilä and Ali Harlin.

Call for Papers

World Journal of Nano Science and Engineering

ISSN 2161-4954 (Print) ISSN 2161-4962 (Online)
http://www.scirp.org/journal/wjnse

The World Journal of Nano Science and Engineering contains original and innovative research pertaining to the applications of the physical, chemical and biological sciences to engineering at nano scale. The highest priority is given to scientific research that transcends the classical boundaries and introduces cutting-edge frontiers.

Subject Coverage

This journal invites original research and review papers that address the following issues. Topics of interest include, but are not limited to:

- Assembly of Inorganic and Organic Nanomaterials
- Carbon and Graphene (Fullerenes, Nanotubes, Nanowires, Nanorings, Nanoparticles, Nanorods)
- Chemical and Biological Detection of Different Phenomena
- Computational Modelling of Materials at Nanoscale
- Cross-Fertilization of Different Branches of Science
- Delivery, Detection and Labelling of Nanoparticles for Drug Release or Gene Delivery
- Detection Methods Sensitive to the Nanoscale
- Energy Resources (Photovoltaics, Batteries, Fuel Cells, Hydrogen Storage)
- Experimental Techniques for Measurement of Properties at Nanoscale
- Fabrication and Growth of Nanomaterials
- Fabrication Technologies for Nanodevices
- First-Principle Calculations and Density-Functional Theory
- High Resolution Imaging at the Single Molecule Level
- Information Processing in Solid State Systems
- Interface and Colloid Science
- Manipulation of Biomolecules (DNA, Protein, Enzymes)
- Modelling Techniques Using Macroscopic Input (Continuum, FE Methods)
- Modifications of Nanomaterial Properties
- Molecular Dynamics Simulations
- Molecular Self-Assembly
- Molecular Simulations
- Nano Composites (e.g. Polymers, Functionalisation, Dispersion)
- Nanodevices (Microprocessors, NEMS, MEMS)
- Nanomaterials and Nanosystems
- Nanopatterning
- Nano-x (Nano-Physics, Nano-Chemistry, Nano-Medicine, etc.)
- Novel Electronic and Photonic Phenomena
- Organic Electronics
- Patterning and Nanolithography Techniques
- Physical and Mechanical Sensing (Electrostatic Forces, Strains, Stresses, Modulus)
- Processing Methods with Nanometre Resolution
- Quantum, Classical and Statistical Mechanical Studies
- Quantum Science and Technology (Optics, Computing)
- Research in the Coupled Regions of Mechanics, Electromagnetism, etc.
- Semiconducting and Magnetic Nanostructures
- Semi-Empirical Methods (Tight-Binding, Embedded-Atom Methods)
- Synthesis, Characterisation and Processing of Materials and Devices
- Systems in the Mesoscopic and Nanoscale Regimes

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of World Journal of Nano Science and Engineering.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

Website and E-mail

What is SCIRP?

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

What is Open Access?

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- •High visibility for maximum global exposure with open access publishing model
- •Rigorous peer review of research papers
- •Prompt faster publication with less cost
- •Guaranteed targeted, multidisciplinary audience
