**Special Issue on Diseases of the Nervous Systems**

**Call for Papers**

The nervous system is a complex collection of nerves and specialized cells known as neurons that transmit signals between different parts of the body. The brain, spinal cord, and nerves make up the nervous system. Together they control all the workings of the body. When something goes wrong with a part of your nervous system, you can have trouble moving, speaking, swallowing, breathing, or learning. You can also have problems with your memory, senses, or mood. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **diseases of the nervous systems**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **diseases of the nervous systems**. In this special issue, potential topics include, but are not limited to:

- Multiple Sclerosis
- Cerebrovascular accident
- Transient ischemic attack
- Epilepsy and aphasia
- Microcephaly and carpal tunnel syndrome
- Bell-palsy and concussion
- Parkinson's disease and alzheimer's disease

Authors should read over the journal’s [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Diseases of the Nervous Systems**” should be selected during your submission.

Special Issue timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>June 14th, 2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>August 2018</td>
</tr>
</tbody>
</table>
